STUDYPROGRAMS

Distance Education (online)

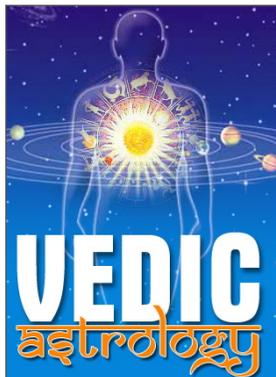

Dutch University College offers Study Programs for students and adults to explore the fields of Philosophy, Psychology and Religion.

Right now our online programs have their focus on Vedic Sciences.

Since time immemorial there has been a continuous attempt by humanity to comprehend the mysteries of life. There have been many sources of knowledge to draw from. The Vedas are records of the ancient and respected Indian tradition of wisdom. The aim of this study is to obtain insight into the deeper significance found in the Vedic wisdom and into the invaluable merits derived from their practical applications into daily life.

These Postgraduate online-programs can be concluded with a DUC Master Diploma in:

- * Consultant Vedic Sciences & the Upanishads (CVSU)
- * Consultant Vedic Sciences & Ramayana (CVSR)
- * Consultant Vedic Astrology (CVA)
- * Consultant Ayurvedic Holistic Health Care (CAHHC)

Consultant Vedic Astrology

In this vocational training of Vedic Astrology you are taught both spiritual and practical skills in order to work as a consultant in this fascinating field. We will learn that part of the Indian Astrology that involves analysis and prediction based on the birthchart. This implies that we will be learning extensively about the characteristics of the planets, zodiac signs and houses and the varied effects that their interactions have on life.

Vedic Astrology or 'Jyotish' has emerged from the primordial principle that all natural phenomena in time and space occur with great precision in such a way that these cycles can be perfectly calculated and the effects of any interactions can be analysed and predicted. The main purpose of the training is to guide people by analyzing their birthchart and to relate this knowledge to the corresponding periods of their lives.

Consultant Ayurvedic Health Care

The (post)graduate study program on the holistic health approach and applications of Ayurveda is composed for medical students, health practitioners and therapists who wish to broaden and deepen their understanding of Ayurveda, which is a major part of Vedic Science.

Ayurveda is one of the most important Vedic studies and applications. We learn that Ayurveda is based on the teachings necessary to comprehend existence, creation and human evolution and shows us how we can successfully apply this knowledge into our daily life.

Intensive Study Program on Vedic Sciences

Vedic Science is the oldest and most original of all sources which has inspired millions of people throughout the world. Renowned scholars such as Einstein, Max Müller, Schopenhauer and H.P. Blavatsky recognized the Vedas as the highest possible authority with regards to human wisdom.

The sacred and original Vedic mantras radiate their light in most subtle detail on all levels of and areas in life.

They reveal not only the principles of existence, life and evolution but also the huge applications of these principles. The most fundamental remark to be made is that everything originates from the same universal source. Intensive study of Vedic Science enriches one's personal experiences and gives practical tools how to apply this to successful daily living.

This Study Program has two options:

1. Consultant Vedic Sciences & Upanishads

This study program emphasizes on Vedic Sciences in the light of the eternal wisdom of the Upanishads. The Upanishads use many dialogues, stories and metaphors to bring out the relationship between man, God and the universe. They explain that the Ultimate Reality is pure and absolute consciousness.

2. Consultant Vedic Sciences & Ramayana

The epoch Ramayana is a holy scripture with a profound symbolism. Very precise and in detail it explains the process of human evolution, from darkness to light. The wisdom of Ramayana is of all times. Especially in our current period of a huge global transformation, Ramayana gives deep insight in the field of human thinking and action to connect us with the source of Love which is present in all of us.
